SENIOR DATA ENGINEER | CLOUD & DISTRIBUTED SYSTEMS

Senior Data Engineer with 4+ years of experience building and scaling cloud-native data platforms on Google Cloud Platform. Specialized in Spark-based ETL, Airflow orchestration, and cost-optimized analytics pipelines supporting enterprise SaaS products and executive-level reporting.

EXPERIENCE

Liferay **August 2021 - Present**

Senior Data Engineer | January 2025 - Present *Diamond Bar, CA*

- Led a company-wide OKR to migrate Jira Service Management data pipelines from Zendesk, delivering an end-to-end production system with SLA monitoring, pipeline observability, and alerting to improve visibility for downstream teams.
- Modernized legacy Matillion ETL pipelines by migrating orchestration to GCP Composer and implementing Python operators for ETL in Airflow, eliminating on-prem compute costs and saving $70K annually.
- Optimized Spark and Dataproc sync logic through dynamic partitioning, parallel API extraction, and adaptive batch sizing, while monitoring job performance and failure rates, reducing runtimes by 50%.
- Mentored and onboarded 3 engineers through code reviews and data quality framework training, accelerating ramp-up and ensuring consistency across deployments.

Data Engineer | July 2022 - January 2025

- Increased customer retention by 20% through deployment of health score analytics aligned with OKRs and KPIs.
- Engineered ELT pipelines on GCP ingesting 100GB/day, implementing incremental loads, schema validation, and data quality checks to improve reliability across teams.
- Reduced SQL query times by 30% on 2TB datasets by optimizing joins, partitioning strategies, and data model design.

Associate Data Engineer | August 2021 - July 2022

- Streamlined customer usage data pipelines, enabling pricing strategy improvements that drove a 35% revenue increase.

Tesla **June 2020 - September 2020**

Data Analytics & Engineering Intern *Palo Alto, CA*

- Analyzed charging station performance guarantees, producing Tableau dashboards and reports with 3,000 business-wide views.
- Automated Python pipelines to clean and merge datasets, improving processing efficiency by 10%.

EDUCATION

University of California, San Diego **September 2017 - June 2021**

Bachelor of Science in Data Science | GPA: 3.51 (Dean's List, Provost Honors) *La Jolla, CA*

TECHNICAL SKILLS

- **Programming & Scripting:** Python, SQL, Shell Scripting, Java, HTML/CSS/JavaScript, MATLAB
- **Data Engineering & Cloud:** Apache Airflow (Composer), Apache Spark, Dataproc, dbt, Google Cloud Platform (GCP), BigQuery, Google Cloud Storage (GCS)
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis
- **DevOps & Infrastructure:** Docker, Kubernetes (K8s), Terraform (Infrastructure as Code), Jenkins, CI/CD pipelines
- **Visualization & Analytics:** Tableau, Looker Studio, R, Matplotlib
- **Tools & Testing:** Git/GitHub, JIRA, Pytest, Postman, Insomnia, Jupyter, Excel
